Rawool Publications

6x6 Sudoku

12 free printable puzzles with answers

How to play

Put 1 to 6 once in every row and column.

Each bold-outlined 2-row by 3-column box contains 1 to 6 once.

Start where a row, column or box has the fewest empty cells.

Choose your level

Easy - 8 puzzles. Naked singles: a cell has only one possible number.

Medium - 4 puzzles. Also needs hidden singles: a number fits one cell in a unit.

Worked example from Puzzle 01

Look at row 2, column 2. The row already contains 1 and 6.

The column contains 2, 3 and 5, leaving only 4.

The top-left 2x3 box has no 4, so write 4 in this cell.

Printing and use

Print at Actual Size / 100%, in black and white.

Use the paper version that matches your printer: A4 or US Letter.

Solutions follow the puzzles and use the same puzzle IDs.

Free for personal, household, classroom, library and activity-group use.
